

COLD ROOM PROJECT ONE-STAND SOLUTION PROVIDER

Create cost-effective cold storage solutions for you, and provide EPC service

1. DESIGN

Senior refrigeration engineers to create economic and professional cold storage design plans.

4. CONSTRUCTION

The experienced construction team pays attention to every detail for safe construction and assured quality.

2. COST

According to the size of the cold storage, temperature requirements, refrigeration equipment requirements, etc., a detailed cold storage project cost list is prepared.

5. INSTALLATION

Professional engineers install refrigeration equipment in strict standards to ensure stable operation of the system.

3. PRODUCT MATCHING

Self-owned factory produces refrigeration units for direct sales, and effectively controls costs.

6. AFTER-SALE SERVICE

Free maintenance for one year. 24 hours respond, CBFI's cold storage maintenance service is efficient and quick.

Guangzhou Icesource Co., Ltd. specializes in refrigeration equipment researching & manufacturing over 16 years. We have a strong R&D technical team with strong equipment production and delivery capability and outstanding engineering construction ability. Our technical team is over 40 persons, including many middle and senior refrigeration engineers and electrical engineers, has deep cooperation with many authoritative design institutes in China. CBFi can provide customers with EPC for cold storage, providing full-process services from project conception, design, cost, equipment production, engineering installation, commissioning and delivery, technical training, after-sales service and operational data monitoring.

Guangzhou Icesource Co., Ltd. serves customers in the cold chain industry in Europe and America. We have accumulated and absorbed many advanced experiences both at home and abroad, not only in engineering design and delivering traditional food processing and storage industries such as aquatic products, poultry slaughter, meat products, fruits and vegetables, but also in the medical cold storage system with strict temperature and humidity control, cold storage workshop for personnel comfort and temperature control, for food and medical GMP certification, and large ice and snow playground and so on.

CBFi cold storage project example

GZ Qiandama Agricultural Products Co., Ltd.

Qiandama and CBFi have formed a multidimensional cooperative relationship, three LCCP (Low temperature, Clean, Comfortable, Plant) aquatic product processing and distribution centers in Shenzhen, Dongguan and Guangzhou have been built.

Auto Pellet Freezing Room Project for Heshi Aquatic

Auto Pellet Freezing Room Project for Heshi Aquatic, which is a leading fishery enterprise in Guangdong Province, is a 6,730 m³ cold storage project for aquatic products. Automatic pellet system is used to fully use the space in the freezer.

GMP Medical Cold Room in Haizhu District GZ

Guangzhou Haizhu District Center for Disease Control and Prevention is a special medical institution under the Haizhu District Government. CBFi provided 15 GMP pharmaceutical cold storage and professional maintenance training for the agency.

Comprehensive Cold Storage & Frozen Project in US

International Golden Food is a famous food supplier for 5 stars hotels and supermarket. CBFi designed and installed a large cold freezer to store food such as red dates and cheese for the company.

Amusement Cold Storage "Ice and Snow Kingdom" in Jiangmen China

CBFi is a strategic partner of Leman Culture Entertainment Co., Ltd. We already built the Leman Ice Kingdom of Jiangmen Wanda Plaza in Guangdong and the Hantian Lefeng Ice and Snow World of Fujian Putian.

Mexico Integrated Fish Processing Cold Room

CBFi designed and built a comprehensive processing, quick freezing and storage project with a total cooling space of nearly 10,000 cubic meters for one of the largest fish processing and supply companies in Cancun, Mexico.
